### OBJECTIVE

Passionate and results-driven Front End Developer specializing in HTML, CSS, and JavaScript, with expertise in Angular. I thrive on solving complex problems and crafting seamless user experiences. Committed to web accessibility and delivering innovative solutions. Proud contributor at BarifloLabs, where I play a key role in developing cutting-edge web applications. My web development journey has been fueled by ongoing education, including immersive courses on Cypress, unit testing, and end-to-end testing (e2e) via platforms like Udemy.

- 

## PROJECTS

- **Employee management system**

At BarifloLabs Pvt. Ltd., I led the development of an advanced Employee Management System (EMS). This comprehensive solution automated HR processes, managing employee data, attendance, and performance seamlessly. Key features included centralized information management, automated attendance tracking, performance evaluation, leave management, and insightful reporting. The user-friendly interface and emphasis on security ensured successful implementation, optimizing HR operations and fostering a more efficient work environment.

- **IOT dashboard**

In my role at BarifloLabs Pvt. Ltd., I led the development of an impactful IoT Dashboard project. This system seamlessly integrated with various IoT devices, offering real-time monitoring and control. Key features included customizable dashboards, alert systems, and a focus on scalability. The project showcased my ability to drive innovation and leverage IoT for enhanced operational efficiency, contributing significantly to BarifloLabs' technological advancement.

- **Employee Attendance system**

In my role at BarifloLabs Pvt. Ltd., I led the development of an automated Employee Attendance System. The project integrated biometrics for accuracy, featured real-time monitoring, and streamlined leave management. Its success resulted in improved workforce management efficiency, showcasing my ability to deliver practical solutions for enhanced organizational processes.
